04 LOGISTICS

Logistics and transportation

Our logistics services support project transportation and delivery operations, with personnel and vehicles matched to the assignment.

01 Project transportation

We supply drivers and passenger or utility vehicles to suit site operations.

02 Delivery sector support

We support food delivery, retail and on-demand distribution businesses with logistics personnel and transportation services.

03 Assignment coordination

Clients can discuss workforce, transportation and equipment requirements together with our team when planning an assignment.

05 EQUIPMENT

Equipment rental

Equipment is available for hourly, weekly or monthly rental to support passenger transport, material handling, lifting, construction and industrial support.

**Passenger and utility vehicles**

Buses, Coaster buses, Hiace vans, pickups and ambulances.

Tankers and trucks

Diesel tankers, water tankers, dump trucks, boom trucks and trailers.

Lifting and construction equipment

Cranes, forklifts, manlifts, wheel loaders and excavators.

Industrial support equipment

Generators, air compressors, welding machines, lighting towers and related support equipment.

Clients supervise and control rental equipment. Our supervisory personnel support operations in accordance with applicable safety requirements and site procedures.

06 HSE

Health and safety

We are committed to protecting the health, safety and welfare of our personnel. Our policy requires compliance with applicable Saudi safety regulations and client procedures. Where requirements differ, the stricter standard applies.

Competence and authorization

Only personnel trained and licensed for the task may operate machinery and equipment.

Personnel welfare

For site personnel, our policy covers safe and adequate accommodation, potable water, first-aid facilities and proper sanitation.

Supervision and safe working practices

Managers and supervisors are responsible for enforcing safety procedures. Personnel are expected to follow site rules, use the required personal protective equipment and consult the HSE or loss prevention representative when requirements are unclear.

Daily safety briefings

Supervisors hold daily toolbox talks on safe working methods and site restrictions. Briefings are documented and shared with the client representative.

07 OUR APPROACH

Purpose and organization

Our vision

To be a trusted partner for workforce and operational support across Saudi Arabia.

Our mission

To provide dependable manpower, logistics, transportation and equipment services that meet client requirements and comply with applicable regulations.

OUR VALUES

Integrity

We act honestly and fairly and hold our personnel accountable for ethical conduct.

Transparency

We communicate clearly with clients and personnel about recruitment, operating requirements and expectations.

Teamwork

We share knowledge and experience to coordinate work and support colleagues.

Innovation and improvement

We encourage learning, new ideas and practical improvements to meet changing client needs.

Professional relationships

We treat clients and colleagues with respect and promote a supportive workplace.

Legal compliance

We are committed to complying with applicable laws and regulations and conducting business responsibly in every market we serve.

Organization

Our organization includes executive and general management, project management, engineering and planning, marketing and business coordination, finance and administration, procurement and stores, and site supervision.
